

## Greggs Environmental Policy Statement

The planet is facing a climate emergency and we acknowledge our responsibility to do everything we can to reduce our environmental impact.

It's our duty as a modern business to stand for more than just profit and that is why we have committed to becoming a net zero carbon business by 2040 across our direct operations and our value chain.

Our aim is simple to '*minimise our environmental impacts & protect the environment from harm*'.

This Environmental Policy commits us to:

- Develop our environmental management systems and processes to improve our environmental performance
- Meet our compliance obligations & deliver on these.
- Reduce our GHG emissions generated in our own operations and in our value chain in line with our science-based target
- Reduce, reuse and recycle as much waste as we can.
- Eliminate or reduce food waste & work towards 100% of surplus food going to those most in need.
- Ensure new building developments and refurbishments taking into account sustainable construction principles.
- Source & procure ingredients and materials in a way that minimises the impact on the environment.
- Consider environmental impacts in all business investments
- Engage & collaborate with our stakeholders/value chain on environmental issues and performance
- Communicate this *Environment Policy* and our wider environmental objectives and expectations to colleagues through appropriate channels..

The Greggs Pledge is our way of doing more to help people, to protect the planet and to work with partners to change the world for the better.

We will regularly review & report on our environmental commitments and performance.

Approved on behalf of Greggs

A handwritten signature in black ink that reads "Roisin Currie". The signature is written in a cursive style and is positioned above a horizontal dotted line.

Roisin Currie, Chief Executive designate
