

Responsible Sourcing - Palm Oil Policy

Overview

Here at Greggs, we believe in doing business in a way that has a 'positive impact on people's lives' and this is integrated into our business strategy at all levels.

Our values, commit us to being enthusiastic, open, honest and treating people with consideration and respect and we live these through all of our people and operations.

As part of this, we want to make our key principles, across a number of areas, clear and accessible to all so everyone can appreciate what we stand for.

Palm Oil is versatile and is considered the most land-use efficient among vegetable oils however its production has long been linked to deforestation, which in turn contributes to water pollution, biodiversity loss, soil erosion and climate change.

As a responsible retailer we are committed to the sustainable sourcing of our products. We are a member of the Roundtable on Sustainable Palm Oil (RSPO), a multi-stakeholder group that set the global standard for sustainable palm oil.

The RSPO has developed a set of environmental and social criteria which companies must comply with in order to produce Certified Sustainable Palm Oil (CSPO). When they are properly applied, these criteria can help to minimize the negative impact of palm oil cultivation on the environment and communities in palm oil-producing regions. RSPO vision is to transform markets to make sustainable palm oil the norm.
