

Our Environmental Policy Statement

Our aim is simple, *'to minimise our environmental impacts and protect the environment from harm'*.

Our environmental policy commitments will be maintained through our environmental management system which covers the manufacture, distribution and retail of our 'food on the go' products.

Our approach is one of continuous improvement & is led at the highest level by one of our Operating Board Directors.

This is what we do...

- Meet our legal obligations and deliver on other commitments
- Reduce, re-use & recycle as much waste as we can
- Ensure natural resources, including water, are used efficiently
- Monitor our carbon footprint and reduce emissions whenever practical
- Use energy efficiently, reducing use wherever possible
- Consider environmental impacts in all business investments
- Engage and consult with our people and external bodies about environmental issues and performance

We set appropriate objectives and targets which we monitor, review and report on throughout the year.

Approved on behalf of Greggs:

A handwritten signature in black ink, appearing to read "R Whiteside", written over a dotted line.

Roger Whiteside, Chief Executive
